Undergraduate - Computer Science

PROFESSIONAL SUMMARY

A result-driven computer science undergraduate in the third year and a passionate programmer who has a good understanding of software performance and great problem solver, possessing a set of good soft skills, seeking a career opportunity as a Software Engineer, focused on enhancing current technical knowledge and using existing knowledge and skills to achieve corporate goals.

TECHNICAL SKILLS

Python | HTML5/CSS3 | Java | JavaScript | React | TypeScript | SQL | Git & GitHub | Rest API

PROJECTS EXPERIENCES

MediGO: Real-time Ambulance Management System (ongoing)

- **Technologies:** Typescript, Next.js, Firebase, Google Maps API
- **Description:** Currently designing and developing a real-time ambulance coordination platform aimed at reducing emergency response delays and improving hospital-to-hospital transfers.
- **Key Contributions :**
  - Implementing the logic for live GPS tracking and digital trip management.
  - Developing core components for role-based dashboards for drivers and hospital staff.
  - Integrating Google Maps APIs for routing and Estimated Time of Arrival (ETA) calculation.
  - Utilising Firebase to enable real-time data synchronisation.
  - This project is ongoing and is expected to impact emergency response efficiency, data accuracy, and fleet management upon completion.

Clean Water and Sanitation Website

- **Technology:** HTML/CSS
- **Description:** Collaborated in a group to design and develop a responsive website dedicated to promoting **SDG 6: Clean Water and Sanitation**.
- **Key Contributions:**
  - Designed and implemented the **front-end interface** using modern HTML5 and CSS3 practices to ensure cross-browser compatibility and a responsive user experience.
  - Utilised **web design principles** to structure and present information on water conservation, sanitation statistics, and community engagement initiatives.

Personal Task Manager in Python for software development

- Developed a task manager with CRUD functionalities. Implemented a user-friendly command-line interface for task management. Utilised Python data structures to efficiently store and manage tasks and enhanced error handling to ensure a smooth user experience.

EDUCATION

University of Westminster, United Kingdom 2024 - present

Bachelor of Science (B.Sc.) in Computer Science

Nalanda College – Colombo 10 2014 - 2022

- A/L examination physics(C), Chemistry(S)
- O/L examination 7As and 2Bs

EXPERIENCES

Volunteer Event Coordinator | Rotaract Club of IIT | May 2025

- Contributed to the successful execution of "Dil se," a cultural event for the university community.
- Managed on-site logistics for a segment, serving 50+ participants and ensuring smooth operations.
- Collaborated in a team of 10+ volunteers, demonstrating reliability and effective communication.

EXTRA CARRICULAR ACTIVITIES AND ACHIEVEMENTS

- **Handball (U-19):** Secured **All-Island Runners-Up** position (2018).
- **Handball (U-20):** Achieved **Second Runners-Up** at the national level (2017).
- **Hockey (U-16):** Crowned **Gold Star Champions** (2016).
- **Handball (U-16):** Attained **All-Island Runners-Up** status (2016).

SKILLS

- **Soft skills** | Project Management | Problem-Solving | Team Collaboration | Leadership | | Brainstorming | Problem solving
- **Languages** | English | Sinhala

CERTIFICATES

- Python Essential Training – LinkedIn (2025)
- Python Data Analysis (2020) – LinkedIn (2025)
- Python GUI Development with Tkinter – LinkedIn (2025)

REFEREE

RM Dhanushka Surendra **BSc(Hons), MSc in Computer Science, LLB, SCJP**
Lecturer
Informatics Institute of Technology
Email: dhanushka.d@iit.ac.lk
Phone: +94 772287083

Omaya Wickramasinghe **BSc in Computer Science, UCSC**
Senior Software Engineer| DirectFN
Colombo, Sri Lanka
Email: therunio@yahoo.com
Phone: +94 767504104
